Service Statement

Filipa Calado

This service statement covers my service work at the Pratt Institute, School of Information (SI), at Pratt Institute broadly, and my external service.

Pratt SI

Since beginning my position at Pratt School of Information (SI), I have been involved in faculty committees and taskforces, student groups, and in the faculty union. I have also been a faculty advisor to 30 - 35 students per semester, and ran workshops for the Digital Storytelling Lab in AY 2025-2026 and 2026-2027.

From my faculty committees and curriculum development, I want to highlight my work in the DH Certificate Review (in collaboration with my colleague, John Decker), the Ethics and Technology Forum Committee, the MS Critical and Creative Computing Task Force, the DEI Committee, and my participation on two faculty searches, the Pratt Faculty Council, and the Peer Review Committee. Please see below for a more exhaustive list of my service contributions.

I also want to highlight my work as a Faculty Advisor, in particular to the new student group, the *Stacks* Student Journal. This group emerged from my INFO 601 course, and they currently are working toward their first issue of the journal that will showcase the high level of intellectual work being accomplished in the 601 course.

Below is an exhaustive list of my service at Pratt SI:

- Responsible AI Task Force (2026-2027)
- MS Critical and Creative Computing Task Force (2026-2027)
- Ethics and Technology Forum Committee (Summer 2026)
- DH Certification Review (2025-2027)
- DEI Committee (2025-2027)
- Faculty Search Committee (2024-2026)
- Peer Review Committee (2024-2027)
- Faculty Council (2024-2027)
- Faculty Advisor, *Stacks* Student Journal (2025-2027)
- Faculty Advisor, Latines in Tech (2025-2027)
- Speaker, Digital Spring Clean-Up Day event (Spring 2026)

Pratt Institute

Beyond SI, I have also been involved in the Pratt Faculty Union, UFCT 1460.

With my colleague Monica Maceli, I am currently a Union Delegate for the School of Information. Besides that, I worked on the Summer 2026 membership drive, an initiative to increase membership at the union which involved one-on-one organizing conversations with several of my colleagues at Pratt SI.

This summer, I joined the Data Team with Philip Ording, my colleague from the Math and Science department at Pratt. Together, Philip and I are working to establish a new database and data workflows for union data, with the goal of preparing our membership for the next round of bargaining, in 2027.

A full list of my tasks and roles for the union includes the following:

- Member of the Data Team (2026-2027)
- Union Delegate for School of Information (2025-2027)
- Participant in the Summer 2026 membership drive (Summer 2026)
- Participant in "Organizing For Power" training series (Spring 2025)

External

My goal with external service obligations is to maintain individual committments to humanities and computer science scholarly communities. For that purpose, I serve as a reviewer for two publications.

The first publication is *Social Text*, published by Duke University Press. Known for its radical and activist leaning, *Social Text* is a leading peer-reviewed journal in cultural studies, one that has published consistently provocative work on gender, sexuality, race, colonialism, environmental issues, and popular culture for nearly 50 years. I have been a member of the journal's editorial board for three years, regularly attending their quarterly meetings and reviewing submissions several times per year. In addition to participating in the collective, I have also joined my colleagues Jayna Browne (Brown University), and Ángeles Donoso Macaya (CUNY Graduate Center) to form the Denkbild review committee, for reviewing short-form submissions to the journal.

The second publication is the Workshop on Gender Bias in Natural Language Processing (GeBNLP), held annually at different conference venues. GeBNLP is an annual workshop that takes place every year for the past 6 years. At last year's conference, held at the Association for Computational Linguistics (ACL) in Vienna, I presented my paper, "Some Myths About Bias: A Queer Studies Reading Of Gender Bias In NLP" in their *Proceedings of the 6th Workshop on Gender Bias in Natural Language Processing (GeBNLP)*. For this year's workshop, taking place at AACL-IJCNLP 2026, I am participating as a reviewer. I plan to continue as both a reviewer and contributer to the workshop in future years.
