34 - In your opinion, what are the three best features of this course?

Response Rate	7/16 (43.75%)

- Readings, discussion, and the structure of the class.
- NA
- -The readings each week offered an interesting and compelling survey of current topics relating to the various fields of study in the information fields. I felt like Professor Calado was willing to take every comment on the reading seriously, which promoted some really great class discussions. -Getting to know my peers through the introductions and informal discussions was a great way to ease myself into this masters program. I made some of my first friends in the program thanks to this class, and I'm so glad to have met Professor Calado as well. -The amount of time and attention paid to the final paper was awesome! It felt like a more advanced paper was expected of me than was in undergrad, and that I was invited to take my topic very seriously and create something I was truly proud of calling my work. At the same time, the final result had very realistic expectations. Frankly I just had so much fun writing my final paper, and I treasured all of the research I did, and all of the help that Professor Calado provided along the way.
- (1) The format of individual course sessions. Prof. Calado allotted a lot of time for discussion and critical thinking within the class period. (2) The strategies for writing papers. Prof. Calado offered a number of skills that I will use when writing future papers. (3) The diversity of the readings. The readings cover a wide range of topics and address issues relevant for today.
- good readings, the process of writing the paper was broken down in a really supportive way.
- Classroom atmosphere/engagement, collaborative nature of conversations, clear and timely feedback from instructor.
- -I really enjoyed a number of readings on the syllabus (Haraway, Nakamura, Lesbian Herstory Archives). I also came away from the course with a much stronger understanding of AI's functions, labor structures, and environmental impact than when I began. -Prof. Calado's feedback on my writing was clear, constructive, and will help shape my essay-writing in the future. -Prof. Calado's strategies for getting the group to discuss readings (summarizing key points, asking questions) were very effective in teaching how to read and write at the graduate level.

35 - In your opinion, what three changes would most improve this course?

Response Rate	7/16 (43.75%)

• n/a

• NA

• -I would have liked to do some more readings. I think that Professor Calado had a good instinct on choosing readings that would interest the class, and provide useful examples for learning at the beginning of the program. I would have liked more of that curation during the later portion of the course. -Near the end of the course, we had a paper revising session. This was very helpful. The class after the revising session was supposed to be a follow-up revision. I rewrote and edited my paper in anticipation of this follow-up, only to have it postponed a week at the beginning of the class it was supposed to occur. Ultimately, this helped me complete a lot more work for my paper before the end of the semester, but I ultimately would have liked to stick to the assignment I thought was due. -Having a revision day on the last day of class before the paper is due, while the paper is due so soon after the revision, can potentially tack on a lot of work. I guess this is more of a 2.b than a third thing I would change, but I think the paper revision sessions need to be completely rethought.

• The way this course is formatted is excellent as it is. If forced to make changes, I might: (1) Reduce the number of readings assigned for each class (I'm a slow reader). (2) Randomize group activities to allow for engagement with many different classmates. (3) Offer materials that are more visual or aural in nature.

• more in class assignments to break up the long discussions.

• Not just for this course but all evening courses: having a cutoff time of even 9pm vs 9:20pm would make a significant difference In the energy cost for FT students who also work FT.

• -Personally, I would have liked to read more and to continue reading throughout the semester (with a tapered amount toward the end of the semester to make time for the paper). -I would have liked to spend less in-class time on paper writing and peer review. The exercises themselves were mostly helpful, but I think a faster pace would have better served their purpose as generative starting points for work I did on my own time. I work outside of school, so I appreciate the thoughtfulness of dedicating class time toward the assignment. However, the readings and seminar discussions felt like the best use of my time--that's when I felt I was setting the groundwork toward future courses. -Responding to specific prompts for the discussion posts may have helped focus our in-class conversations and cohere some of the ideas among readings week-to-week.

36 - If you would like to add anything else about the course or the instructor(s), please do so here.

Filipa Calado

Response Rate	3/16 (18.75%)

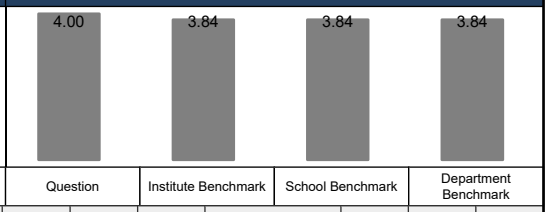

• n/a

• I am so glad to have had my first class with Filipa Calado, and I look forward to taking classes with her in the future if I can.

• Prof. Calado is an excellent professor. I learned so much from this course, not only in its content but also in teaching writing strategies. Prof. Calado fostered a collaborative environment that encourage engaging discussion.

37 - This course supports diversity, equity and inclusion.
