34 - In your opinion, what are the three best features of this course?	
Response Rate	9/17 (52.94%)

• -I liked that we had a lot of time to work on the paper - I think a lot of students are coming from different backgrounds so it's good that there were conferences / rough drafts etc. for people to get feedback along the way. Also hard to feel overwhelmed when it's broken up into so many mini assignments. -I liked the discussion posts -Professor was engaging, I feel like we had fun in class

• The readings were great. The instructor facilitated discussion and classroom community. There was a lot of support for the final project.

• The writing workshops we had in class for our research papers were very helpful. I also think the professor's breakdown of essay writing was the most coherent I have ever heard. I have never had a college course that bothered to go over the mechanics of writing a large paper before, despite studying English in my undergrad. The tools I have gathered from the writing workshops and essay writings will be invaluable for me moving forward. I liked the course structure and I feel like the subject matter we were reading a discussing in our class was more interesting, complex, and related to critical thinking than what I heard other classes were reading. I think the readings rounded out our knowledge of the field (without having everyone read dry texts about "what information is")

• Professor Calado did an amazing job of choosing reading materials that were interesting and relevant in the first half of the course. In the second half, she provided extremely helpful guidelines on how to think through, plan, and improve our research papers. I also really loved that we started each class with introductions & an ice breaker question. This is my only class that at the end of the semester not just I knew each person's face and name but also felt like I knew them at least a little as a person.

• 1. The structure of it, I enjoyed the first half of the semester focusing on readings and responses, and the second half focuses on our final project. 2. Professor Calado's instructing 3. Discussion groups and encouragement of working with classmates

• Research paper had really clear instructions. Professor Calado does really well in guiding and teaching us how to write the paper.

• 1. Professor Calado is a kind professor who puts in great effort to make students and the environment comfortable 2. The workload is manageable 3. No confusing assignments, unclear rubrics/scoring

• 1. Now that I'm finished with it I can say the final paper. 2. Readings--I really enjoyed the wide selection, and the mix of very recent current events articles with older/more foundational pieces. 3. Icebreakers! It was very nice to have an intro course that encouraged us to get to know each other, and I think it helped build a fun class dynamic.

• N/A

35 - In your opinion, what three changes would most improve this course?	
Response Rate	9/17 (52.94%)

• -Everyone works differently, but I personally was not a fan of the second peer edit happening during our last class / day before paper was due. When I have a few projects from different classes due simultaneously, I like to manage my own time and set my own earlier due dates for assignments in order to manage everything. I know it was just small, surface-level edits, but I still like the choice of being completely done slightly before a due date. So I would probably move that peer edit to the week before. That being said, I know a lot of people do things more last minute and may not have a completed rough draft the week before. -This is just a small thing, but sometimes assignments weren't posted on Canvas yet when I was going to submit them. Not a big deal, but a couple of times I nearly forgot to submit something because it wasn't up the first time I checked. For example, I think the fieldwork assignment wasn't put up until close to the date it was due, but one of my events was earlier in the semester, so I would have liked to just fully check it off my list once it was completed (instead of keeping it in the back of my mind).

• I would prefer to have more readings in the second half of the semester. If we are focusing on writing exclusively after spring break, I think some readings about writing would go a long way to make that more engaging. The fieldwork presentations were very casual and could have been more thorough.

• I have no notes.

• Maybe an additional chance in class for professor feedback on our research papers before final submission, but Professor Calado also said we could go to her office hours so that was ok.

• My only real feedback is that sharing writing responses and writing in general can be a bit nerve wracking. Later on in the semester the Professor remarked on our writing can be hard, but also writing should be shared and I think if that was brought up or said earlier in the semester it might have been helpful.

• N/A

• Not changes, but during the very last weeks (2 or so?) of class, I felt that some of the excercises were redundant, and would have appreciated more time to just work on the paper. Or, if we were doing excercises, perhaps they could be optional, or people who wanted to participate in them would be separated and do that. I did enjoy the peer review, but some of the other excercises, not so much.

• For Fieldwork Events--maybe offer two different days for presentations instead of just one. It was a little hard to remember all the details of people's events and it could help give more time for questions. Also, I think it would be a good idea to have an open discussion thread in Canvas where we could post potential fieldwork events throughout the semester for everyone to see.

36 - If you would like to add anything else about the course or the instructor(s), please do so here.	
Filipa Calado	
Response Rate	6/17 (35.29%)

• Great class and great professor! Really helped us with the research paper step by step and very accessible for questions.

• I would highly recommend taking this course to anyone.

• Professor Calado was my favorite professor this semester and I really hope I get her for other classes!

• Professor Calado's Foundation of Information course was filled with a lot of intimating topics and readings. However, Professor Calado's approach each class made each topic and reading seem less intimating. Her approach in helping us to understand the topics we discussed was very welcoming and inviting which was very much appreciated. She would often remark on how the readings could be dense or not easy, but that we should take out time with them, and encouraged us to try everything.

• I felt we were well-supported leading up to to the final paper through the various check-ins, peer reviews, in-class group work. I really enjoyed this course and hope I can take another with Prof. Calado in the future!

• Very approachable.
