**34 - In your opinion, what are the three best features of this course?**

| Response Rate | 4/6 (66.67%) |
|---|---|

- Really interesting topic, I liked the meaningful readings and discussions, gave me much more confidence with python
- - the smaller size of the class meant you had more time to troubleshoot with the professor - tied the skills we learned to a real life context - class time was always used effectively
- 1. The conjunction of critical thinking supported by readings with technical learning. 2. The hands-on aspect of the course truly guided us in acquiring a powerful skill. 3. The open dialogue and flexibility to adapt the program throughout the entire time.
- We learned a lot of useful skills and practical knowledge, we got to work on a project of our choosing with a fairly wide range to select from to suit our interests, and we got a lot of personal time with the professor getting feedback and help on each of our individual projects. We also got some interesting theoretical background on algorithmic bias and interesting discussions of these readings in class. Probably the best features were the flexibility in choosing a project, getting all of the practical experience building bots, and the personal attention and feedback from the instructor on our projects and work.

**35 - In your opinion, what three changes would most improve this course?**

| Response Rate | 4/6 (66.67%) |
|---|---|

- It's useful to learn how to use the command line, but everything we typed goes away once the terminal is closed and I wished I had taken better notes!
- - maybe less ambitious goals? a lot of it seemed advanced that's it! i really enjoyed the class and am glad I took it.
- 1. Considering the particularities of each student's technical setup, I may would send "setups homework" previously from each class. In that way, the first part of class would be to guarantee everyone is on the same page, and then move on. 2. May the final project proposal be an early assignment, so it can be developed over time. 3. I'm interested in the conceptual aspects of machine learning and ever-evolving technologies, so it would be great to discuss them further. Also, it would be beneficial to me to understand better the overall idea of a script and workflow before digging into the code itself.
- I'm not sure, I really liked it. Maybe the Analog assignment could have been more clearly motivated and developed.

**36 - If you would like to add anything else about the course or the instructor(s), please do so here.**

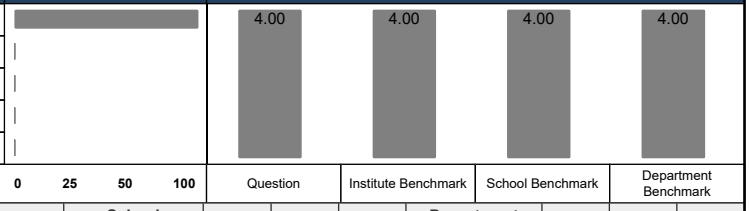

**Filipa Calado**

| Response Rate | 2/6 (33.33%) |
|---|---|

- Filipa is a great instructor and I've really enjoyed this class, each week was super interesting and I really appreciate her perspectives on coding, automation, and pretty much everything!
- Thank you so much for this class! I feel that now I have a superpower, and I'm eager to keep practicing!

**37 - This course supports diversity, equity and inclusion.**
