34 - In your opinion, what are the three best features of this course?

Response Rate	3/13 (23.08%)

- - very hands on - very organized - lots of content covered
- - great environment for learning a new technical skill, especially if you have no prior experience - opportunity to work on a final project related to your own interests - highly applicable and skillset
- 1. The live coding. It's nice to follow along and see what we're learning together 2. Learning about Python libraries 3. Final Project. It allows for each student to be creative and make it their own.

35 - In your opinion, what three changes would most improve this course?

Response Rate	3/13 (23.08%)

- - n//a
- n/a - great course
- 1. Rubrics. It was not clear what was expected for the final project. A lot of time was spent in office hours (several students) or in class trying to understand the requirements. I think a rubric or something similar would help communicate the project goals. 2. Canvas. If all of the links and Python libraries were stored in one place it would be easier to get to. 3. A class tutor. I think if there was a Python tutor, it would help us rather than having to wait to ask the professor all the time.

36 - If you would like to add anything else about the course or the instructor(s), please do so here.

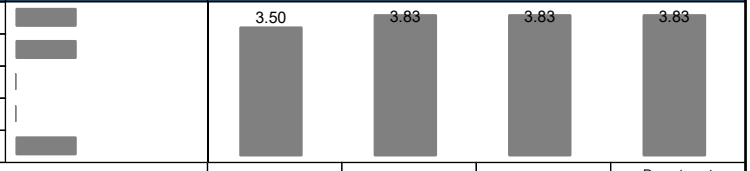

Filipa Calado

Response Rate	3/13 (23.08%)

- n/a
- Amazing course, and amazing professor!
- This course is really fun. Even if you aren't trying to be a programmer, you learn really useful skills and it helps you understand the internet and data on a deeper level. Prof. Calado is very encouraging and very available. She's clearly in her element when it comes to Python.

37 - This course supports diversity, equity and inclusion.
