1 Service Statement

1.1 Pratt

Since starting at Pratt, I have been involved in faculty committees, student groups, and in the faculty union. I have also been a faculty advisor to ~30 students per semester, and ran workshops for the Digital Storytelling Lab in AY 2025-2026 and 2026-2027.

Below is a summary all of my Pratt service. From this work, I will highlight the progress of the *Stacks* Student Journal, a group of students from previous iterations of my INFO 601: Foundations of Information course. These students decided to peer-review and publish their papers from this class, and they are in the process of producing their first issue, which will be out in early spring 2027. This issue will showcase for the high level of critical work and writing in the 601 course.

- Faculty committee and curriculum work:
 - Peer Review Committee and Faculty Council (2024-2027)
 - Diveristy Committee (2025-2027)
 - Faculty Search Committee (2024-2026)
 - DH Certification Review (2025-2027)
- Faculty Advisor to student groups:
 - *Stacks* Student Journal (2025-2027)
 - Latines in Tech (2025-2027)
- Union work (UFCT 1460):
 - 2026-2027: Member of the data team
 - 2026-2027: Union delegate for School of Information
 - 2025-2026: Participant in the Summer 2026 membership drive
 - 2025-2026: Union delegate for School of Information
 - 2025-2026: Participant in "Organizing For Power" training series

1.2 External

In addition to my work at Pratt, I also serve as a reviewer for two scholarly publications, one in the Humanities, the *Social Text* journal and another in Computer Science, the annual Workshop on Gender Bias in Natural Language Processing (GeBNLP).

Published by Duke University Press, *Social Text* is leading, peer-reviewed, and radically-oriented journal in cultural studies, which consistently publishes provocative work on gender, sexuality, race, postcolonialism, and popular culture. I have been a member of the journal's editorial board for two years, regularly attending meetings and reviewing submissions.

GeBNLP is an annual workshop that takes place across different venues. Last year, I published my paper, "Some Myths About Bias: A Queer Studies Reading Of Gender Bias In NLP" their *Proceedings of the 6th Workshop on Gender Bias in Natural Language Processing (GeBNLP)* at the Association for Computational Linguistics. This year, I have joined the workshop as a reviewer for the 7th Workshop on Gender Bias in Natural Language Processing at ACL-IJCNLP 2026.
